SUMMARY

Computer Science undergraduate focused on backend and AI/ML systems. Builds production-style APIs with FastAPI, integrates ML models (XGBoost, scikit-learn) and LLM pipelines, and deploys with PostgreSQL and Docker. Strong foundation in data structures, algorithms, OOP, and SQL.

EDUCATION

Amrita Vishwa Vidyapeetham, Amritapuri — **Kollam, Kerala, India**
Bachelor of Technology in Computer Science – CGPA: 7.94 — *Aug 2023 – Aug 2027 (Expected)*

Cochin Refineries School, Kochi — **Ernakulam, Kerala, India**
CBSE Class XII – 89.3% | *CBSE Class X – 92.8%* — *2022* | *2020*

PROJECTS

Disease Prediction System | *Python, XGBoost, FastAPI, PostgreSQL, Streamlit, Power BI* **May 2026 – Jun 2026**

- Built an end-to-end diabetes risk prediction platform by engineering 7 clinical features and integrating ML models with a FastAPI REST backend and Streamlit dashboard, enabling automated patient risk assessment.
- Benchmarked Logistic Regression, Random Forest, LightGBM, and XGBoost, achieving 0.83+ AUC-ROC; integrated PostgreSQL for prediction persistence and Power BI for analytics and visualization.

Dark Pattern Detector | *Python, FastAPI, PostgreSQL, Gemini API, Docker* **Jun 2026**

- Developed an AI-powered detection service using FastAPI, PostgreSQL, and Gemini to identify 10 categories of deceptive UI patterns and generate structured credibility reports from analyzed interfaces.
- Resolved an AI model deprecation outage by implementing an automated multi-model fallback layer, enabling seamless model switching without application changes and improving service resilience.

RepVault Fitness Tracker | *React, Cloud Firestore* **Aug 2025 – Nov 2025**

- Developed a fitness tracking web application with secure authentication and Firestore-based data management, enabling users to record and access workout data across devices.
- Optimized Firestore queries and real-time synchronization to minimize unnecessary database operations and deliver responsive, low-latency access to fitness records.

SKILLS

Languages: Python, Java, C, SQL, JavaScript
Backend & Frameworks: FastAPI, REST APIs, React
Databases: PostgreSQL, Cloud Firestore
AI/ML: XGBoost, Scikit-learn, LLM Integration (Gemini API)
Tools: Docker, Git, Power BI

ACHIEVEMENTS & ACTIVITIES

- Conducted a cybersecurity and digital-wellbeing awareness session for 40+ Class IX students, covering phishing prevention, cyberbullying, and AI misinformation detection (SSR Community Outreach, Nov 2025).
- Completed workshops on Generative AI product prototyping (Sep 2024) and Model Context Protocol (MCP) workflow automation with Cursor IDE and MCP servers (Aug 2025).

HOBBIES

- Sketching Pictures
- Photography

LANGUAGE PROFICIENCY

English, Malayalam, Hindi – Read, Write, Speak and Understand. Tamil – Speak and Understand fluently.
